July ARKLOW TRIP 1926

17/6/26. A glorious day.
Sandbanks, at the Cutty, C. S. S.
Bought fish, & box of "Red flint", 7d.

27/6/26. A dull warm day, practically 22
Sandbanks, met a fellow at Cutty, C. S. S.
(Worked large bledd between me & a Fell-Fisherman)
Selmia基础, 1 fish for a hanger.
Bought crab for 7d. men.
Tateyfis鍋 for 7d. 9d.
Carnac pottery 2d. with L.A., NEW TO IRELAND.

Pottery 7d. 9d.
Plume 9d.

Pottery 7d. 9d.

[? pottery & men at dinner]

Pottery, fisherman, very mild.

R. A. P. No. 69. 24th June.
3/1/26. Another glorious day, with some a cold
in the sky, but the cloudy E. breeze in the
air to cool it. Went visiting a schoolhouse.
Characteristic, some of the schoolboys called
me a "North Irishman," and one young fellow
asked me if I had a "long coat." I said I had
one, but he said, "What did you do with it?"
A pleasant evening in my first appearance on
the field at Peter's.eacher explained to Jones
field. Last part of it in place.

2/1/26. To learn at Kilmoe.

Another glorious day, with a slight E. breeze;
but could with little difficulty and big
efforts.

And a series of questions! Yes.

Peter, or was it John? I'm not sure.

Another series of questions! Yes.

On the field, again the same situation, but
in a different place.
3/126. Evening 7-0-8 P.M.

With plans, T. and L. both in bed. Father went out.

Rifles ready to fire? .22/250 rounds.

Camp at Puck's Bridge. (5 of us over at 7.)

N. O. A. Shearers: 6 pm. 1st. 3rd. 4th. 5th.

Cella, banded. 200. 2. 77. 7. 22.

11-11-26. Took in many note (entitled small Baptist) a small clump, in Church Glen, Skye (Skye Valley), No. 261.

Ecliptica is. Also bought from local store, well developed, from a large tree, planted at a. thumb of edge of Peninsula. S. of St. Berty, camped at 7 on its Planting 19 Dec. 26. in box & small, very beautiful, yellow & green, Eclipta (Eclipta). 20 10 28. The work, (Marl grey bent-floor) small like many in use, so if some small had escaped. Finally after that note I counted out of the box as it had balls in each, and on the clothes was long been holding in all 14 noted. 13. 10. 26.

Vegeta Vulgaris was long-kept really called the clothes plants on the clothes.
36. 10. 1926. R.A. Phillips took a Kalkata
vulcanite on ! Battersby, at Terranora, C.W.
Gun & Pistol but not same funds, but
att time it killed was covered with snow
but the dog was sorry.

22. 11. 1926. T.S. Shinnor, 59 Chard Road, Bepaha
and 2 F.F. Vulga voles. Taken at Fry at
Brachian C. Luck.

Takley at R.A. Phillips.

Kalkata, or whatever.

Polemica, or whatever, my fault!

R.H. and wife, W.W.
1927.

2.1.27. Halted from New York, N. by Haddam, channel (1) to the N. to N. turn N. Finally a turn channel to Woodstock (2).

2.2.27. A small group at head of channel.

3.3.27. Took sound of channel 24 kg. of raw of fish.

4.4.27. Took sound of channel 30 kg. of raw of fish.

5.5.27. Took sound of channel 34 kg. of raw of fish.

6.6.27. Took sound of channel 38 kg. of raw of fish.

7.7.27. Took sound of channel 42 kg. of raw of fish.

8.8.27. Took sound of channel 46 kg. of raw of fish.

9.9.27. Took sound of channel 50 kg. of raw of fish.

10.10.27. Took sound of channel 54 kg. of raw of fish.

11.11.27. Took sound of channel 58 kg. of raw of fish.

12.12.27. Took sound of channel 62 kg. of raw of fish.

ARKLOW - July - TRIP, 1927.

Tuesday 28th June 1927.
A dull day, cold, with sleet, no rain at all.

The sky was grey, the sun was not visible.
Waves making quite a splash, no wave at all.

Although the sun was not visible, the sea was still rough.

Weather: Stormy, S.E. wind.

Brenta became dead calm, not even a ripple on the water.

29th June 1927. A day of total eclipse of the Sun.

A bright, clear sky, not a cloud in the sky.

Full eclipse from 7:12 a.m. to 1:19 p.m.

We walked along the beach, observing the eclipse.

In the morning, I walked along the beach.

At 10:19, the moon's shadow reached its maximum position.

We then had a breakfast at their house.

The sky was very clear, with no signs of rain.

30th June 1927. Sudden rain with N.E. wind.

All day till 5 p.m.

After the rain, we walked along the beach.

Weather: Stormy, S.E. wind.

Brenta became dead calm, not even a ripple on the water.

Add: 1759b. Men and women.

P总结：

- 28th June: Stormy weather with sleet, no rain.
- 29th June: Total eclipse of the Sun, clear sky, no clouds.
- 30th June: Sudden rain with N.E. wind.
July 1927. A late foggy day, mist as usual, a colder windy, but lots of insect out.

6th Nov. 1927. A cold grey, wild, wintry day.

After breakfast, some excursion fell to on the
Geographica Nomad ride on from Port & A.D. to Bay
at about 12.00 P.M. but did not return to

I was at home, found a ftumen, 4, of the fern
inside the door. Notably the fern
from the commuters paid their visit to our
left the evening at 4.7. C.B. was exploring
of a bitumen. For: family it came out
of the corn. It is a family that is located out of one
reason, hidden in the hollow of a bitumen
the whole bitumen went. It will need it

Nov. 7th. 1927. A very pleasant day, with the sky gray.

At seven a.m., after a hard frost,

we left the bitumen. The fern was not abundant,

and a foot of left corn of wheat. For reason

in the fern was hidden. Later, bitumen, about

in one place. We go up to 4,000 ft. or more.

As we climbed, we saw two bitumen, but not
explored, until after, we began. We had to
be careful, the frost, I climb.

West of Sylphann sent to A. Roman and

we will need it before the supervision, or later.

No. 1. Sylphann became, that we do not know. 0, 1. The Roman says,

South of the bitumen, (backing) Mr. ANS. 40.7. 26.

No. 2. Sylphann became, 0, 2, and 3, 4. The Roman says,

South, Blumenau, Mr. ANS. 30.7. 25. Formerly.

No. 3. Sylphann became, 0, 3, 4, 2, 4. The Roman says,

South, Blumenau, Mr. ANS. 30.7. 25.

No. 4. Sylphann became, 0, 4. The Roman says,

South, Blumenau, Mr. ANS. 30.7. 25.

No. 5. Sylphann became, 0, 5, 6, 0, 7. The Roman says, "It is a nice day."

No. 6. Blumenau, Mr. ANS. 14. 6. 25.

No. 7. Sylphann becomes, 0, 6, 7. The Roman says, "It is a nice day."

South, Blumenau, Mr. ANS. 19. 6. 24.

No. 8. Sylphann becomes, 0, 6, 7. The Roman says, "It is a nice day."

North, Blumenau, Mr. ANS. 19. 6. 24.

No. 9. Sylphann becomes, 0, 7, 1. The Roman says, "It is a nice day."

North, Blumenau, Mr. ANS. 19. 6. 24.

No. 10. South, Blumenau, Mr. ANS. 19. 6. 24.

South, Blumenau, Mr. ANS. 19. 6. 24.

South, Blumenau, Mr. ANS. 19. 6. 24.

South, Blumenau, Mr. ANS. 19. 6. 24.
No. 13. Glypha. mem. & ven. ant., leg. tentorium! Roman says "in imperfecturae, with yellow stipple differ."

No. 15. Glypha. mem. & ven. ant. F. Roman says, it looks like a "ven. & ven. ant." differ from mem. & ven. ant. in plant, genus. It does not distinct, & indicates as of little importance.

No. 16. Glypha. & ? Roman says "virtually similar, but..."

No. 17. & not equal to sex. It is equal!

No. 18. Glypha. mem. & ven. ant. & ven. vine. It looks like a "ven. & ven. ant."

No. 19. Glypha. mem. & ven. ant. & ven. vine. It looks like a "ven. & ven. ant."

1928.

22nd Jan. 1928. Walked from 6th Rowan up Glenavon to down Glenave to Lurinam. Primmer in (see 318 ends!) at Balmoral, in old row comb along 6th Rowan. Many apple crown of Trichium on broad view. 4th Feb. Balmoral at 12.00/3.00.

5th Feb. 1928. Walked from Balmoral up channel to North Arm bent family & those of Althorp. When very good Erica round seen at top of Glenavy SE. Threw apple under 6th Rowan Hill, seen amount of P. Sylvestris & track to Bally. Almost gloria day after foggy evening. No hazy light seen. This morning in more generally at Althorp. It is very much commoner now than 

26th Feb. 1928. Dr. to meeting at 13.00. Sticks up to post of Arran. A clear day but after a spell of wind and the leaves backward. Saw Balmoral Hall up head of 6th Rowan, seen g. Balmoral. 2nd Feb. Andrews. 6th Rowan, seen g. Balmoral. 6th Rowan. A puzzle received taken to Bally. The bag, 2nd Feb. 1928. The two on a rock in the stream, a wall, the only wall, in the stream & to 5th Feb. This finished the account of Balmoral, as usual.
8th March 1928. Bright and cold after some fine
spring days. Glen ethe Larneberry (beautiful)
Co. Wt. Nothing done but some early
collars, well out. Wors Yeats Murray Brae.
    Turkey_Murray.
11th March 1928. Very cold, Mr. Macm, frequent
showers of piddly, snow. Several
12th March 1928. Heavy snow all day which
lay for a couple of days, but end of week
again fine. Mr. Macm. rescued bride's mother!
18th March 1928. A warm day with snow
showers but most of the snow stuck on the
Ballyharry Co. Wt. No snow stick in you
Then hail, the snow had been many, 12 cm
Grants ethe Ministry of the Valley.
Another aspect of 30 cm in snow & Ollers.
Nebi pocaran seen, cut up grass
in normal.
3rd March 1928. 11 pm till 2:30: cloudy.
My hall, wall wipetot. Large group with new
flying birds, bird trees at sand plant. Rain
in flat & deep on approximate level.

8th March 1928. 19th March 1928.
Did some running out in Glen ethe Barm
Castle Vall ethe in Kilmezin Channel, near Bann.
Think he met it on 19th February.
No body seen us no Clay hill head.

19th March 1928. A glorious day, after a most
depressed fog, cold, snow.
Glowen Bridge district 12 - 3pm.
McNab's of T Yatra, Cornar 2.15 to 4.30pm.

seen at upper part of stem. Also c. seen by lower
wings at upper hedge. Again captured.
Scole cephalotes mostly ?

24th May 1928. Afternoon. A most delightful day
all morning. First time for the first time since last.
Occidential + Commenent (C. W.)
Andrena cinerea pair at all Habitats took 99 pair.
Park Antennae rapa.
Dytiscus vinculatus + petiniae 99 + 99 at usual
marshes at 99 99 abundant :99 seen.
D. javanicus 99.
Dytiscus mittis 99 + cress.
Megalodron pallidus 99 + cress.

[Collected by A.A. Leroy.
Park, South, C. W. A.M. 28.5.28.]
27th May 1928. Sent to Clara, 11, to get some large metallic pins & put them in the lunch box. Arrived at home on 22.5.27, but it rained all day & we did nothing. Saw one of the chimney sweaters, doing work in the street, on the way home. Reported him to the police and he was arrested.

28th May 1928. A perfect day. Left men all day only 3, to work on 28th inst.

Returned to Clara, 11, but could not see a trace of the metallic pins. The following morning, they were not found. The leading men. And the sweaters were all put in the lunch box.

Returned home at 10.30. D. had gone.

Isolde gave 299 at 10.10. jc. the 15th. Will have the end.

Also gave 299 at 10.10. jc. the 15th. Will have the end.

Closed Bridge. Sat down at 10.30. jc. the 15th.

Saw Isolde. Put on the other parts. jc. the 15th. Will have the end.

23rd May 1928. A fine, sunny afternoon. Spent the day with my brother, N.E. and I. took a walk.

Mr. Goldie's comb.

Very fine bowlers win all with your 99 in jewellery 99 (no known win & only 99).

Borne. Winning 99 was used and later used with different caps: most 99 much as D. said. 1-5. D. 3-10. 99. 8-9. 1-5. 0-2.
SECOND FIELD EXCURSION

Saturday, 2nd June, 1928,

TO PORTMORE DISTRICT.

Conductors: — The General and Sectional Secretaries.

This excursion will take the form of a preliminary inspection of Portmore and district, an area selected by the Committee as suitable for a regional survey. All members can render assistance in the work, which will embrace the various branches of the club’s activities. An outline of the scheme will be given at the excursion.

The area has the following boundaries:

North—Glenavy River, from mouth to Leap Bridge.
East—Road from Leap Bridge to Lower Ballinderry.
South—Road from Lower Ballinderry to Gawleys Gate.
West—Shore of Lough Neagh from Gawleys Gate to mouth of Glenavy River.

Time Table—

Motors leave Museum, College Sq. North, at 10-0 a.m.
Arrive Gawleys Gate about 11-0 a.m.
Leave Tunny Bridge for Glenavy River at 2-0 p.m.
Leave Glenavy River for Lower Ballinderry at 4-45 p.m.
Tea at Lower Ballinderry School at 5-0 p.m.
Leave for Belfast at 8-0 p.m.

Members and friends provide their own lunch.

Cost of Excursion (including tea)—
Members, 7/6; Non-members, 8/6;
Members using own cars, 3/-.

Please send applications for places to Mr. E. N. Carrothers, 145 Stranmillis Road, Belfast, on or before Tuesday, 29th May, 1928.

E. N. CARROTHERS | Hon.
ARTHUR E. MUSKETT | Secretaries.

24th June 1928. Good day, had almost wind without rain. Sun shone. (With Mr. Smyth at M. Lleny.)

Saw surfacing C.W. just before the fall.  

Corn opened 6.8.1. Luca 4.30. Seen by my son 

Alexander returned 9.25 am.  

Sawed 2.40. 1.7 pm.  

Osborne taken by Sayer.  

Trenches were made at 5.30. (Time 2.00)  

Cow killed: at Mr. Tooke, 9.00, shyly at 6.00.  

Trench 403 taken by Sayer on Thursday.  

Rainfall: 0.2. 30 am.  

Stearn 4.08 7.10 am. 

Trench 403 9.08. 2.58 pm. taken 9.20.  

Buried by Tooke. 

Trench 403 taken by Sayer in 5.10, Snider, I. W.  

Buried by Sayer 1 pm  

Buried in trench 403 or 1.30.  

29th June 28. 6.30 am. sunny, little rain. 

Saw surfacing C.W. after 3.00.  

Took to Palmer 1.30. Called a hooker.  

C.W. taken 11.20 11.30 Noon, but did not fall.  

Saw surfacing C.W. at 1.00.  

Trench 403 taken at 1.05. pm. 

4.08. 4.00 pm. 3.00.  

Corn opened 9.30. 3.30. taken 1.5.  

4.30.  

Still surfacing C.W. at 5.00. 

Buried by Sayer at 3.15.  

Buried by Sayer 6.00. 

1st July 1928. A wild, stormy day, with almost continual rain all morning. 

Drove to Frome C.N.E. Showered up at Bewley valley to Bewley. Very nice food and wine for miles at St. Bewley for the thing's sake in fine. 

Work of the trench 4.30 pm. or 4.30. men. in Storby's field at Bewley.

Storm to Essen, 1400. Ascended towards town of Allindan, C. U. 1. There was a great deal of water, but not all available. A shower of North Britain. Clothing in place. Rain and thunder of varying duration. J. J. J. Palmer on 23. June last. The snow is a great square block of green, which in the bottom of the water was a little from NE corner of town (no writing). The snow will have in one week on the 5th of this week.

Tinkerflax 9th from broken at lower. Strand in snow 1 ft. rain in mud. 5 ft.

Snow and drift taken in N. Britain on 4. 20.000 N. a section broken north to R.C.L. Woods. Thrashed with a rope. 4 ft. in 0.7 ft. mud.
11th July 1928. A very hot (and) dry, with a part cloud of rain: hot & hot west wind (about a gale).
Gave to wickeni, via Rethmi, c. 11h. Ran to K pesil
Palma & took him, & hung on to K,, 1, 000
2 o'clock, & started home to St. Anthony, actual time 3 o'clock. Stopped at Constanta, Forthich, Rethmi.

Borne to Station, 3 miles.

10th Sept. Overcast, fine day, hot, wet & wind.

11th Sept. Fine day, hot north, mist over, 1500 ft.

12th Sept. 1928. A fine sunny day, little wind.
Great day along S.E. shore of Deep Bay, testing for Vestaria Alleghani, Rich plant in astrology
small stone in damp like step stone of new hostel at Erina estate, with the following plant associations.

13th Sept. 1928. A fine day but misty, 10 am clear.

Three full syringes (Rheums, Sphagnum & Scengifera) taken - 30 g. large lungs from 5 tall

Collects rhizobiaceae, & of other insects.

6th Sept. 1928. - Credit day! Rain at night! 

Talked to my friend, Mr. Smith. We took his 

young American in last year. 

Talked to Mr. Smith. We had 3 eggs in an hour. 

I saw 2 fish today, 1 in another. 

18th Sept. 1928 (afternoon): A fine sunny day, still cool. 

Berrera, 8.30 am. received many packets. 

Cathedral service 1 o'clock. 

No other church, but with 

Vespa vulgaris: male still my nature. 

Heliconia, O. 3rd flowering, calyx, 3 rows. 

Millers returning 9.30 a.m. 

Streelman sarpedon, 2 and 4. Still large. 

are leaping about, fly like butterfly. 

Tresvinta, middle, 9.19 a.m. 

People sleep 2.3 a.m. 

20th Sept. 1928. - With another tour. 

23rd Sept. 1928. - Fine day, still medium, but keen 

East wind! 

State of Egypt, 8 a.m. 

Berrera, 30.8, 1.30 a.m. 

Vespa vulgaris 9 a.m. 

Cathedral service 1 o'clock. 

Church service 8 a.m. 

30th Sept. 1928. - Fine day, still medium. 

22nd Sept. 1928. - With another tour.
30th Sept. 1928. A fine day, with afternoon fog. Went down the river to Willoughton, channel a bay near the corner of the river, C.W. The afternoon in letters. Both in good condition, getting long & healthy.

13th Oct. 1928. Weather fine, wind E.N.E.

11th Oct. 1928. Weather fine, wind E.N.E.

12th Oct. 1928. Reindeer Station (on way to Willoughton)

15th Oct. 1928. Osprey Station, B. S. I. No. 50

15th Oct. 1928. Went to Willoughton Station in the morning, W. I. Not cold & drizzzy rain, no snow to form. Went again. Shot a deer near Willoughton W. I. It was in a bog, & off water, almost

20 Oct. 1928. A glorious day! Walked on Bray Head, via Killabeck, Little Sugar Loaf, via Kilbrackanoge, Rocky Valley, to Snarkmagh. On Bray Head, met Park Bradley jinney, 14 horses, 17 grooms, 4 lace jockeys, all in hats. On Little Sugar Loaf, took 8 horses. Upon Bray Head, 2 men on a mast; took a large sickle iron stone, then in a well of limestone a foreign piece (?sherd). On mast took two No. 2 Peristylus under stone. Saw also a monitor. 
Limestone and white granite were obtained at E. J. Ryan's bog. By Coleman, the quarry, 
Kilbrackanoge, foreign pieces all round on 
caminite, 1160 feet alt. (also 380'ft. falloff). 
J. J. Ryan found Cerastodon perluculentus or long head 
white No. 24 the moment, just below the new point on Snarkmagh.
18th Decr 1928: A dull day, still strong S.W. wind & drizzle.
Walked up to top of Glenmore a along upper Borradaile to 1200 ft., then across more to E. at base of Glenmore, then around to one end, then towards upper, 1270 ft. 
Borradaile 1200 ft. to Glenmore 1270 ft. to Borradaile 1200 ft. to Borradaile 1200 ft. to upper Borradaile 1200 ft.
The discovered Hymenophtalum unilateralis, growing near one of the large granite boulders in upper Borradaile at about 1200 ft. at 800 m for many years in C. Borland. F. T. Riley found both on another boulder near same place, which proved to be N. and not next to elaterium. (held checking)

8. Canon bought on a horse & a horse & a horse sometimes & also in town at Glenmore, 8m, on 17/12/28

24th Decr 1928: A fine day, cold wind over Pikes. Walked on down side of upper Borradaile near bottom of the upper Borradaile, and of left side of Borradaile. Picked up variety of moss, ferns & flowers. Rodent burrows, & 2 below near 1 home close to galley bank.

16th Decr: A sunny day. Aftergale heavy rain from considerable rainy period. Walked from Hampton to Bulliggen, M.E. & Du. Sats 8.30 p.m. looking for salmon at Bulliggen, M.E. at 12.30 p.m. Climbed "Birch Tree" for salmon & Glenmore. Sats the salmon hide but none noticed at 8.30 p.m. Mr. Gates, very abundant.
42. *Sphecius caligula* Hom., Deewn, R.C. 1599.

Yes, it is *caligula*. Many years ago I took this same specimen in some numbers at *Sphecius* in the woods of old Stedman (win.)

Here too, it is a parent of *Sphecius*. A.R.

44. *Pumula* sp. F., Deewn, R.C. 1599.

A very interesting species to me. The colour and the shape of the head are very characteristic. I have never seen one in Europe, early summer.

45. *Pherampus confusus* F.

A.R. (spotted.)

46. *Pherampus confusus* sp. F. Deewn, R.C. 1599.

A.R. (spotted.)

47. *S. galea* C. F., Deewn, R.C. 1599.

A.R. (spotted.)

28th. 27th. 6th May. 
My first day out after about 2 months. 

22 March. Still fine, but very dry, with a strong wind. 

21 March. Fine rain in the early morning, and a strong wind. 

V poorly. 

Ballynahinch all day, and a strong wind. 

24th. 25th. 26th April. 

Ballynahinch, morning, afternoon, evening, and a strong wind. 

23rd. Still fine, but strong wind. 

21st March. Fine rain in the early morning, and a strong wind. 

20th March. Fine rain in the early morning, and a strong wind. 

19th March. Fine rain in the early morning, and a strong wind. 

18th March. Fine rain in the early morning, and a strong wind. 

Ballynahinch, morning, afternoon, and a strong wind. 

17th March. Fine rain in the early morning, and a strong wind. 

16th March. Fine rain in the early morning, and a strong wind. 

15th March. Fine rain in the early morning, and a strong wind. 

14th March. Fine rain in the early morning, and a strong wind. 

13th March. Fine rain in the early morning, and a strong wind. 

12th March. Fine rain in the early morning, and a strong wind. 

1st March. Fine rain in the early morning, and a strong wind. 

And there the story ends, as there were no more entries in the journal.
51. *Pseudophyllus* Apisialus, in a large, long, slender, spiny, flagellar, *Pseudophyllus*. It is not, and even external recognizably for the large, long, slender, *Pseudophyllus* genera, Dioptra. In my opinion the species of genera - D. orientalis, D. xanthocerus, *Pseudophyllus* + *Pseudophyllus*. No doubt the species of genera have any difference from small *Pseudophyllus*, I agree, and prefer or reject the insect of the gigas. *Pseudophyllus* but then in a certain family, we do, or them all. **A. R.** 25. 2. 27.

52. *Exophora* occupans, **Sp.** and a very strong appearance, with black head, grey. An intertwined between them. **H. J.** 26. 3. 27. A. R. "A R. Co. et. inc. **H. Blackman** S. F. California, VU!"

53. *Cyclops* (Opisthopsis) *Pseudophyllus*, VIR. 12. 27. **R.** An empty, empty, but add. "I am not sure whether the. (i.e., *Pseudophyllus*) is a distinct species or a color form of *Cyclops* sp. They have been mixed with *Cyclops* sp., but I do not know any species of *Cyclops*.

**A. R.** 26. 3. 27. *Cyclops* (Sp. et. inc.)

55. *Cyclops* *Pseudophyllus* or **Sp.** VIR. 26. 3. 29. "Opisthopsis ("Pseudophyllus") elegans. Sold! A. R. 26. 3. 29.

58. *Cyclops* Weyrauch, **Sp.** VIR. 26. 3. 29. "As not *Cyclops* sp. These to become I terminate, but not species of. It is that wrong, the potato, term are remarkably short. **A. R.** 26. 3. 29.

59. *Cyclops* dubia or robusta? **Sp.** VIR. 26. 3. 29. "Possibly this is robusta (but I still think a *Cyclops* sp. Vir. 26. 3. 29. "Cyclops* or *Cyclops* sp. (C. part.) 3 or land organ; which is wrong, looking up robusta). Or take this, but a little larger, is in our Smith collection. **A. R.** 26. 3. 29.

Stockholm Nov. 18th, 1927.

Dear Mr. Stelfox,

Now your Clysiae are perused & I am returning them to you. Your identifications are not at all bad, in fact most of them are quite right & only wanted a confirmation. It is remarkable how dark the colour is on most of them, a little darker than in Scandinavia, where it is, however, darker than in central Europe. No doubt this is a consequence of your climate with much moisture & little sun. I am sorry you had no species with "broken" costa falcis, but I only remember two, Fractigena Thun. & genalis Mill., both are rare, but you had at least a species with an intermediate form (bipunctata Thunb.), so you can imagine how it looks (see also your notes!). Two species I had almost expected to find in your box, viz: mandibulator Thunb. (Oxthoquata Thunb.) & forcipatus Heer. The former is not rare in all Sweden, is easy to recognize by the yellow clypeus of. The latter is a small 3 with blackish fuscus & thickly pubescent clypeus. I think it is simply the 3 of Vulcator Heer. Perhaps you will find them in the future. By the study of your specimens I found there is a distinct variability in the length of the tendra within certain species. There is much reason to believe, that different hosts have produced these variations & I suppose they are real races & not only aberrations.

Unfortunately your specimens were very difficult to handle & it is sheer luck I have not broken anything. Outside the British Isles entomologists have no experience of the short needles & consider them a nuisance. For Hypocoptera I heartily concur with
this opinion, I find well founded. Some time ago I wrote about it to Rev. Johnson & have not yet received an answer, so he may have grown cross. I hope, however, it will not be for a long time, for he is a kind & interested gentleman & accordingly a desirable correspondent.

Your notes accompany this letter. Your next box is expected with mixed feelings, for interesting as the insects maybe, the needles are, to speak with a Swedish proverb, as “salt in a sour eye.”

Yours truly,

A. Roman.
Specimen of genus Glypta from
G.W.S. Nat. Mus., Dublin.

1 & 2. 0 & 4. Run to rostrata Holmg. [but I] "die hintersten Schienen spitzen und Tarsen" are not "schwanz"! I presume this is your "hornless var." If bicornis which Johnson has recorded? Is this var. really the rostrata of Holmg.? I have only seen a few specimens & only taken myself.

3 & 4. 0 & 7. Run to ceratites Grav. but "hintersten Sporen" do not seem to me to be "fast länger als der halbe Metatarsus." Very common.

Glypta ceratites Gr. 3.

Glypta elongata Hgn. 3. dark var. Wanted, A. Ryan.

7. 1 & 7. Runs to monoceros Grav. I have one other 7.

Glypta monoceros Gr. 9. dark var.

8. 1 & 7. Runs to genalis Miller, but metasternum is not, in my opinion "vollständig gefalldert mit kräftigen Leisten." Is it possibly only a block "rostrata"? It comes from the same locality as the 9 "rostrata" above (No. 2) & is the only specimen I have seen.

What is the "Wange Leiste"? And where is it "gebrochen"? I don't know Red to look for!

Wange = cheek. The "Wangenleiste" is the posterior margin of the cheek, it is called "broken" when it has a narrow emargination. Seems to be a black var. of G. bicornis rostrata Hgn. (Wangenleiste).
9 & 10: Run with doubt to "measurer" gran. Very common. (signature)

11. 9. Smaller & doubtfully the same as No. 10.
   Right.

12. 9. A large reddish specimen with very elongate tibia & short tarsomere 2 + 3 segments.
   Same species as No. 10. An interesting form of "measurer", perhaps = nigrotrachiterata, but no yellow stigma & more red on abdominal tergites.

13. 9. Same as last? Only stuck.
   Is nigrotrachiterata, only the yellow stigma differs.

14. 9. Same as last? Right, only darker.

15. 9. With elytra? "dichotome?" for the "dichotome?" for the "dichotome?" for the "dichotome?" for the "dichotome?"
   Then, it seems to run to "measurer" gran., but the costulae are "dichtlich". This, the only specimen, then seen with "dichotome?" for the "elysta?" for the "elysta?" for the "elysta?" for the "elysta?"
   in the same locality in Ireland, off the Dublin coast, in No. 10. Is "measurer" gr. Seems to differ from "measurer" only by the less densely pubescent elytra. The more or less distinct costulae are of little importance.
16-17. 8+7. I cannot make these fit anything, but they seem distinct from anything I have. It is not uncommon but I have only taken 279.

Probably *similis Bridg.* (clypeus densely pubescent!)

18-19. 8+7. Seem to fit *bifasciata! Very common.*

Right, but var. with costa sp black.

20. 1st (cuter mutilated). Johnson named this *filicornis,* but I am more than doubtful if it fit that species.

Either *similis* or *filicornis,* but impossible to discern in a 8.

21-22. 8+7. A very distinct species with red legs and very long tarsi. Run to *longicornis Htg.* Than numerous 887 + 203 77.

Probable right, but is only a form of *bifasciata* (antenna?).

23-24. 8+7. Run to hesiator 

seem fairly well marked. Common.

25. 17. Run to *rigicornis (?).* I have another 7!

Right. Have found 8 at Upsala on umbelliferous flowers.

26. 17. Run to *varicosa Form. (or ? pedata Depr.).*

The only specimen I have seen. Right. 8 from Upsala has purer white on hind legs.

27-28. 8+7. Run with much doubt to *terminatis Htg.*

This is a common species in the mountain at 1,000 to 3,000 ft. above sea level, amongst *Calluna vulgaris.*

Is *parvicornis.*
29. 17. Somewhat like the last (28), but with shorter teres; a differently colored kind, this is tai. Johnson named the specimen "scalarii" grau! This specimen was also taken in the mountains.

30. 17. Might run to filicornis, Howi. But does not seem to fit that species. Is hypomus "nicht" or "dicht" schopfig behaart? The only specimen I have taken is nigricornis. Hyp. seen in profile thickly pubescent.

Ost. The eugapogon (Wagnerella) is tinamous, nearly "broken." Right, but the species ought to be called bipunctoria Thumb.

33. 10. Runs to crassescens. Right. The only specimen. Further.

34. 10. Said I cannot place at all! Probably measureman, but difficult to say from a single 5.

Please return these notes.

To A. S.
